

## Aerial Work Platform

Aerial Work Platform - There are a variety of lift truck accessories existing on the market. They could help transform your forklift so that you can expand your ability to pick stuff up or complete clean up tasks and material handling with out difficulty.

Many of the accessories are specially designed in order to fit on the forks themselves. Blade extensions for instance, are used when you require a lot more blade length, that increases lifting capacity. Fork extensions come in lengths ranging from forty eight to one hundred twenty inches. Triangular or rounded accessories are another kind utilized whenever transferring rolled material so as to make certain it does not roll off of the typical flat forks.

Lifting attachments could be pivoting and telescoping crane attachments. They come in many styles. These attachments are usually utilized for transporting poles, lumber, metal bars or whichever kind of bulky things. Other attachments like various kinds of hooks and hook plates are available so as to pick up stuff utilizing a sling or chain. Magnetic lifters and slab lifters are other items which can be utilized along with hook attachments. Slab lifters are specialized attachments that are utilized for lifting a variety of materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that connect to your lift truck to make transporting rolls of carpet easier. The attachment connects onto the lift truck's forks and has a pole which goes through the middle of the carpet roll.

There are several types of lift truck attachment used for facility maintenance such as snow forks. These industrial blades could be connected to front end loaders and meant for transferring materials such as dirt, and mulch as well as snow. Other common cleanup accessories include magnetic sweepers and standard sweepers. Standard sweepers comprise a broom that the forklift blades hook onto for sweeping big spaces such as parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in places where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up effortless and quick.

Material spreaders are other accessories utilized on forklifts. These spreaders are handy for a variety of applications such as spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Another optional lifting accessory are work platforms. These can be used by lots of various companies day after day. Platforms may differ in size from 36" x 36" to up to 60" x 60". Several models may be available and are capable of folding up and storing into a smaller place. Work platforms are designed to raise workers up to an overhead location with the use of the forklift. Larger platform units have additional space for workers so as to carry tools and other essential things for the task. Usually work platforms are constructed of poly material or steel.
